Got it — the Master Knowledge foundation is in place.

Confirmed structure:

- **Deudalaya Pvt. Ltd.** as the company
- **लयपुर (Layapur)** as the core product ("City of Spaces")
- **देउडालय** as one cultural/community space inside Layapur
- Clear Phase 1 (physical community) → Phase 2 (digital) sequencing
- Supabase already in the codebase (production readiness still to be verified)
- 10 specialized Codex skills ready
- Two source-of-truth files:
  1. `DEUDALAYA_MASTER_KNOWLEDGE.md`
  2. `deudalaya-core/SKILL.md`

This is now the correct starting point for any future agent or developer. No application code was touched and nothing was deployed, which is exactly what we wanted.

How would you like to proceed from here? Possible next moves:

- Verify / harden the existing Supabase integration
- Expand or refine any of the 10 skills
- Start Phase 2 digital architecture planning
- Something else entirely

Just say the word
